

MULTILEVEL GOVERNANCE MODEL (MGM)

Code: **MARIE/MEDBEES/IL/WP3/SM4.3/PA/MGM**

Type of output: **Model**

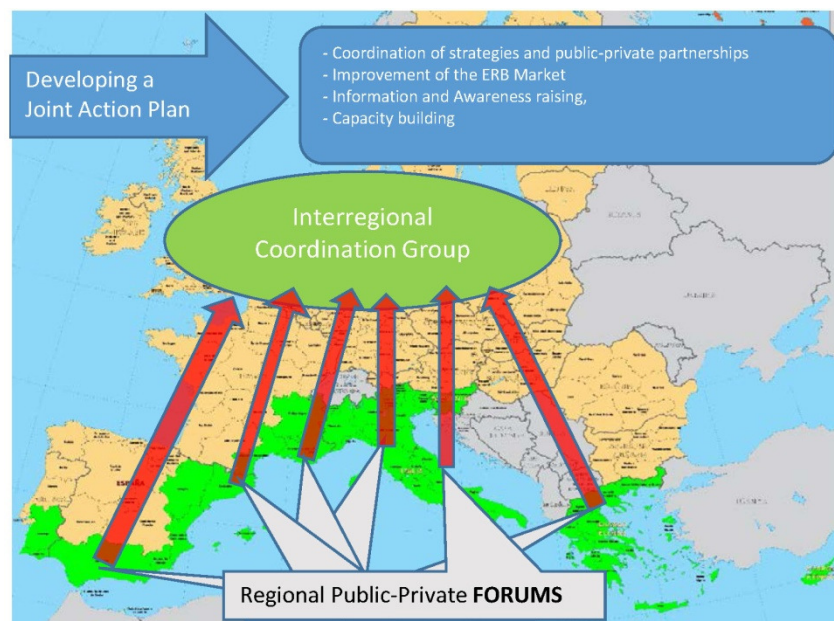

Responsible partner: **DTES**

Key words: Multilevel Governance Model, Regional government coordination, Joint Action Plan, polycentric balanced approach, macro-regional approach

Description: *A model to prepare innovative governance for ERB.*

The model proposed is based in three main components:

1. Focus on how responsible of ERB public authorities and private organizations (ERB supply and demand) should build a joint structure able to facilitate the MED ERB market development.
2. These original ideas (1) should be applied at regional scale. The generation of Public Private Forum Associations in MARIE regions has been a rich input in this sense. Especially the practical example of Forum ECREE in Catalonia gives MED regions an experienced way.
3. Concentrated in the coordination regional forums (2). Next schema shows how a public unity can coordinate a Joint Action Plan based in 5 main actions developed by 5 public private working groups.

Interactions: **MARIE/MEDBEES/IF/WP3/SM2.3,SM4.2,SM4.3/PA/MGM (Multilevel Governance Model)**

Analysis: The strengths: MED Regions will have a model to coordinate their ERB strategies. Weaknesses: difficulties in procedures to achieve coordination between regions and municipalities.

Interest: to provide a future basis for a ERB macro-regional approach in MED Area
