

## ASSOCIATED PARTNERS PLATFORM (APM)

Code: **MARIE/MEDBEES/IL/WP3/SM4.3/PA/APM**

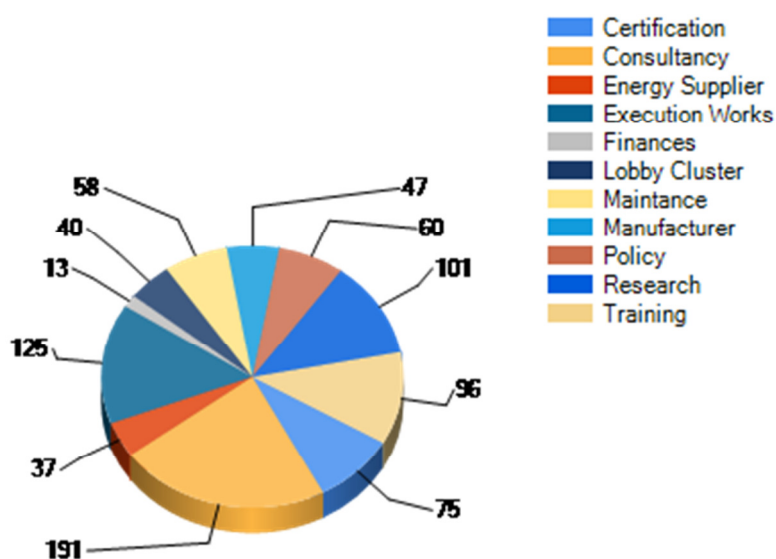

Type of output: **Platform**

Responsible partner: **DTES**

**Key words:** Platform

**Description:** A Platform to facilitate Road Map's implementation and Multi-level Governance Model Development.

The MARIE APP ([www.marieapp.eu](http://www.marieapp.eu)) has been produced by the Government of Catalonia and has been tested during 2012, 2013 and 2014 as a platform to facilitate the participation and interaction among MARIE associated partners and other entities .

In August 2014 the associated entities participating in MARIE APP are more than 500 with a very high diversity of entities as its visible in the previous graph.

At the end of the MARIE project the APP will have the last version of all the MARIE products and facilitating interaction and involvement of all MED stakeholders interested in it.

After MARIE the APP will offer the opportunity to support the Multilevel Governance Model (MGM) and the Regional Road Map implementation. But also APP can be a very practical tool to develop 5 actions and public private working groups foreseen in MGM.

Interactions: **MARIE/MEDBEES/IF/WP3/SM2.3,SM4.2, SM4.3/PA/MGM (Multilevel Governance Model)**

**Analysis:** The strengths: MED Regions will have a platform to coordinate their ERB strategies. Weaknesses: Management of the platform after MARIE.

**Interest:** to provide a future very practical tool for ERB strategy coordination and to develop a Joint Action Plan.
