

INVESTMENT PROGRAMME MODEL (IPM)

Code: **MARIE/MEDBEES/IF/WP4/SM5.1/IPM**

Type of output: **Model**

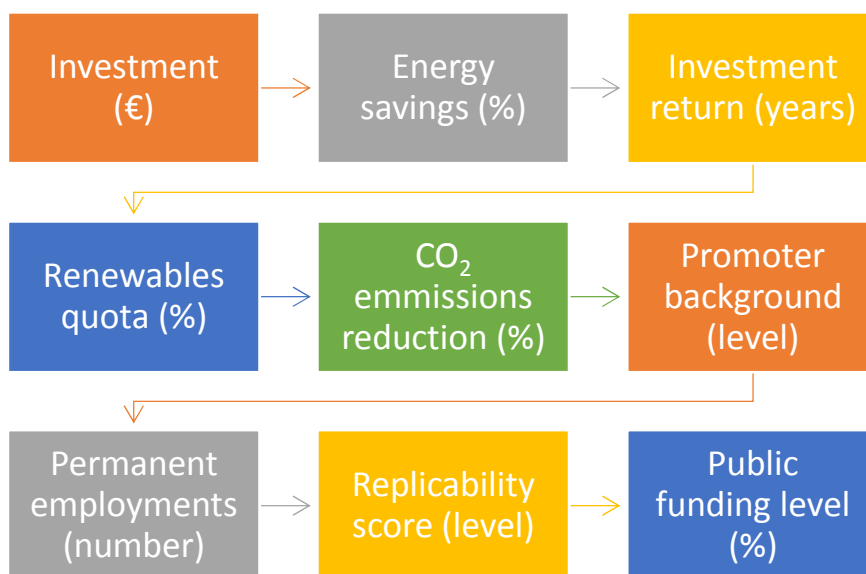

Responsible partner: **AVRA** (Housing and Renovation Agency of Andalusia)

Key words: Investment programme, ERB Projects, energy efficiency, resources assignment,

Description: *An investment programme model to assign financial resources at regional level*

The MARIE Investment Programme Model (IPM) aims to *provide guidance* for planning any energy renovation of building (ERB) by the regional MED public authorities. Specific *ex-ante assessment process* should first define the main characteristics of the plan. Then, IPM offers an innovative procedure for ranking and planning ERB projects through the *MIIP Tool – Maximum Interest and Impact Projects*, designed to apply at large scale level. Finally, the investment programme promoter should *select the intervention lines* presenting the major interest and priority at regional level. Further, a *progressive approach* including mapping, pilots, call for interest are then recommended to the MED regions to initiate their ERB process.

MIIP's Criteria

Interactions: **MARIE/MEDBEES/IF/WP4/SM5.1/PA2.2/IPM**

Analysis: The strengths are to have a model to organize, plan and program ERB investments. Weaknesses are difficulties to choose most interesting investment.

Interest: A solid method to plan ERB investments for Regional Authorities.
