

RESEARCH PROGRAMME (RP)

Code: **MARIE/MEDBEES/IL/WP5/SM3.4/RP**

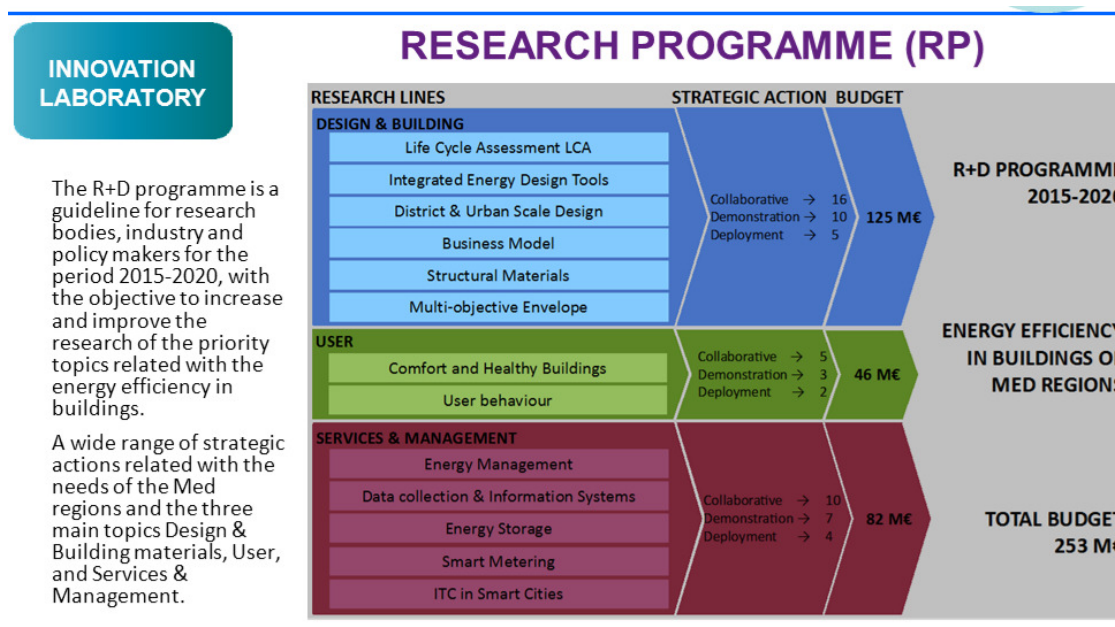

Type of output: **Programme**

Responsible partner: **IREC**

Key words: Innovation, research lines, new technologies, new software,

Description: A Programme to organise research in MED space during next 5 years (2015-2020)

The ERB R+D programme is a guideline for MED research and innovation bodies, industry and policy makers for the period 2015-2020. The RP objective is to increase and improve the research of the priority topics related with ERB. A wide range of strategic actions related with the needs of MED regions and the three main topics: Design and building materials, users, and services & management.

Interactions: **MARIE/MEDBEES/IF/WP4/SM5.1/PA1.2/IPM** (Investment Programme Model)

Analysis: The strengths are to dispose a program to organize a common research in MED space. Weaknesses cost and funding are not clear for the moment

Interest: Facilitate the research planning in all MED countries related to ERB.
